 - a. Consider Approval of Minutes for May 5th, 2022 Meeting
 - b. Update on LMS Bylaw Draft – Lt. Witt
- V. New Business**
 - a. Report on research conducted into potential mitigation project – Bradford County Emergency Management.
- VI. Comments from Committee Members**
 - a. Paul Still:
 - i. The plan (R.I.V.E.R. grant Application) to remove vegetation from Lake Sampson at the point where Lake Sampson flows into the Sampson Canal/River should be updated and submitted to the SRWMD for funding.
 - ii. The current conditions of Alligator Creek between 301 and the Laura Street bridge and the potential for blockages to cause upstream flooding.
 - iii. The current conditions of Water Oak Creek and the potential for blockages to cause upstream flooding.
 - iv. The current conditions of the Lawtey Alligator Creek drainage system and the potential for blockages to cause upstream flooding.
 - v. The potential impacts of the Chemours mining and surface water discharges on flooding in Bradford County.
 - vi. The current conditions of the Sampson Canal/River between the CR 225 Bridge in Sampson City and the CSX downstream trestle.
 - vii. The design and current conditions of the SRWMD Edwards Bottomlands Mitigation Site and the potential for blockages to cause upstream flooding.
 - viii. The current conditions in the Lake Hampton drainage basin and the potential for blockages to cause upstream flooding.
 - ix. The current conditions in the Lake Santa Fe and Lake Alto drainage basins and the potential for blockages to cause upstream flooding. This would require working with Alachua County.
 - x. The current conditions of the Santa Fe River and the potential for blockages to cause upstream flooding. This would require working with Alachua County.
 - xi. Formation of a LMS committee to address flooding risk and flood mitigation opportunities.
 - b. Mary Lou Hildreth – City of Hampton:
 - i. FDEP Resiliency Grants
 - c. Other Committee Members
- VII. Adjournment**
